-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawings were received on 9/27/04. These drawings are approved.

Claim Objections

2. Claims 1-8 and 10-14 are objected to because of the following informalities: what does it mean by "by sectors", recited in claim 1, lines 5-6; claim 6, lines 4-5; claim 10, lines 5-6. Note that any claim whose base claim is objected is likewise objected. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Liew, US Patent No. 6,415,153 in view of Murai et al US patent No. 6,628,667.

Art Unit: 2637

Liew discloses a system comprising a digital signal processor 110 for converting digital baseband CDMA signals into parallel signals and an RF processor 160 for converting the digital baseband signals outputted from the digital signal processor 110 into analog RF CDMA signals using a pair of D/A converters 162 and 170, respectively. However, Liew does not explicitly teach that the signal that the signals are converted from a first rate to a second rate where the second rate is twice the first rate. In the same field of endeavor, Murai et al teaches (fig. 14) a data is converted from a first rate (128Kbps) into a second rate (256 Kbps) where the second rate is twice the first rate. Given that fact, it would have been obvious to one skill in the art to incorporate such a teaching in Liew in order to obtain a variable rate transmitting method capable of holding a linear characteristics of power amplifier and providing high quality data transmission as taught by Murai see col. 3, lines 11-14.

Allowable Subject Matter

5. Claims 1-8 are allowed. However, the claims must be amended, if necessary to overcome any objection sets forth above.

6. Claims 10-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2637
